

CODAN GrabBag™

Miscellaneous IV Specialty Products

CODAN GrabBag™

CODAN has for years specialized in making IV sets in a variety of constellations to the hospital market. Recently, we have begun to focus on a few select specialty areas within the arena of IV administration sets, extension sets and transfer sets creating the following product categories:

CODAN for Kids™

CODAN Anesthesia™

CODAN Rx™

CODAN CYTO®

You may consult individual specialty catalogs as well as the CODAN website for more information on any of those four product lines.

This leaves a number of CODAN sets available, which do not fall naturally into any of the above categories, yet they still remain very popular products. Consequently, we have grouped those items into a non-specialty catalog, which we have given the name *CODAN GrabBag™*.

The CODAN GrabBag product line is best described as a conglomerate of various products like infusion sets with latex-free injection site; straight-line infusion sets; filter sets and regular bore extension sets.

CODAN GrabBag™ Product Line

Important Benefits:

- The CODAN FlowStop Cap™ offers fast, easy and drip free priming of drug administration sets
- All CODAN products are non-DEHP and latex free
- I.V. Star® Filters with air elimination for retention of particles, micro-organisms and air
- Quality tubing sets manufactured in the United States and Europe guarantee product pedigree

Product Categories:

Infusion Sets: Latex Free Injection Site

Non-DEHP sets with latex free injection site(s).

Infusion Sets: Straight Line

Additional standard IV administration sets.

I.V. Star® Filters & Filter Sets

Filter products for air compensation, air elimination, bacterial barriers and other special applications.
