

CODAN for Kids™

Infusion Therapy Products for
Neonatal and Pediatric Patients

CODAN for Kids™

Quality, dependability, and accuracy are important features of the *CODAN for Kids™* product line which is designed for critical care of the very young patient.

You can depend on our high quality CODAN manufactured components and small diameter, light-weight tubing to safely deliver life saving drugs and nutrition.

Engineered controls like the CODAN R-Lock, which is a male-female luer lock integral check valve, and our in-line bacterial retentive and air eliminating I.V. Star® filters along with the hydrophobic CODAN FlowStop Cap™, all work together to reduce the risk of bacterial or particulate contamination.

CODAN LightSafe® is our unique amber tinted tubing that protects infusates like TPN with multivitamins from becoming peroxidized due to exposure to ambient light.

Product Features

Small tubing and components configured for maximum utility with less bulk are required for children rather than standard hospital-issued adult products.

CODAN microbore and minibore tubing is designed for precise delivery of vaso-active drugs, costly antibiotics and drugs that need to be dosed over exact time intervals.

Pediatric filters and other *CODAN for Kids™* components ensure that tubing sets meet the needs of children.

CODAN LightSafe® provides a measure of protection to infusates from being chemically altered by overhead and billirubin lights.

- Low Priming Volume Products
- Infection Control Products
- Non-DEHP and Latex Free Tubing for Universal Drug Compatibility
- Aseptic Priming with CODAN FlowStop Cap™
- Check Valve, Latex Free, Needlefree and Non-DEHP Products
- Bifurcated and Trifurcated Sets
- Needlefree and Latex Free Injection Sites

Important Benefits:

- Specialty set configurations for NICU and PICU patients
- Quality tubing sets manufactured in the United States and Europe guarantee product pedigree
- LightSafe® tubing reduces peroxidation of TPN and provides protection for light sensitive drugs
- Wide range of multi-line minibore and microbore extension sets

Product Categories:

I.V. Star® Filters & Filter Sets

Filter products for air compensation, air elimination, bacterial barriers and other special applications.

Extension Sets: MiniBore

Sets with smaller inner diameter tubing for the critical care of neonates and pediatrics.

Extension Sets: MicroBore

Sets with the smallest inner diameter tubing for low priming volume and increased accuracy in the critical care of neonates and pediatrics.

LightSafe®

Sets made with a unique amber tinted tubing which provides added protection for light sensitive drugs and improves TPN deliveries.

Product Examples:

BC576

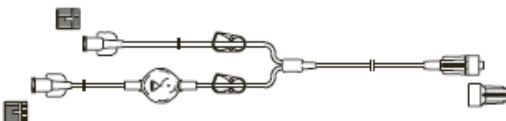

MicroBore Extension Set, female luer-lock, slide clamp, luer-lock, CODAN FlowStop Cap™, length 60", approximate priming volume 0.35 ml, 50/cs

BC205

Bifurcated MiniBore Extension Set, 2 female luer-locks, 2 color-coded on/off clamps, luer-lock, CODAN FlowStop Cap™, length 7", approximate priming volume 0.2 ml, 50/cs

BC689

Bifurcated MiniBore Extension Set, 2 female luer-locks, 0.2 micron air eliminating filter, 2 on/off clamps, luer-lock, CODAN FlowStop Cap™, length 12", approximate priming volume 0.9 ml, 50/cs

"CODAN will be an environmentally conscious manufacturer of clean, safe and simple specialty products for the Infusion Therapy Market to the benefit and satisfaction of both patient and caregiver"

CODAN in the United States is a part of the European-based CODAN Group of Companies, which for more than 50 years has been a market leader in the area of IV drug delivery systems to healthcare institutions around the world.

In the North American marketplace we are known specifically for the high quality of our products and our excellent record of on-time delivery.

CODAN's core business is the manufacturing and sales of IV sets and accessories for both infusion and transfusion therapy. CODAN products are sold through a select network of distributors in the United States and Canada.

Infusion Therapy made Clean, Safe and Simple
